

2020 April 03 Update - CNL extends period of reduced operations

Following a review of the current COVID-19 pandemic conditions, as well as CNL's operational needs at all locations, we are extending the current period of reduced operations up to 2020 May 4. Please refer to general announcement at the following link:

https://www.cnl.ca/en/home/news-and-publications/news-releases/2020/extended_reduced_ops.aspx

This is a precautionary measure. We have not been informed of confirmed or presumptive cases of COVID-19 at any CNL site.

CNL will continue to monitor the COVID-19 situation through its Crisis Management Team, and should the environment change in this period, and it is safe to do so, CNL will resume routine operations.

CNL would reiterate that its Suspension of Non Essential Services does not apply to work where it can continue to be effectively and efficiently carried out off site, at your own facilities or where work can be remotely and safely carried out.

As a result of these ongoing circumstances, unless CNL confirms differently, the status of your services to CNL shall remain as previously notified. If for any reason you are unclear or did not receive a notice, please reach out to your CNL representative or contact information below.

Our decisions continue to be based on communications and guidance issued by Canadian Governments and Public Health agencies, which continue to evolve. CNL will provide additional announcements as events continue to unfold both directly and via this Vendor Portal.

Should you have further questions please communicate these through your formal channel for notices under your contract with CNL.

A direct communication will be issued by CNL to all affected Contractors. Any Contractor who does not receive a communication, or is uncertain as to whether they shall continue to provide services and or any arrangement for working at CNL sites, is encouraged to contact their CNL Contracts Representative for clarity or email enquiry to Procure@cnl.ca.

Phil Colwill
